1. This communication is in response to applicant's amendment received on February 27, 2004.

2. Claims 1-11 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1,2, line 7/6, it is unclear as to what derives the angle; perhaps applicant intends to say "a means for deriving from the pulse train...";

In claims 1,2,10-11, it is unclear from the language of the claim as to how an orientation signal generator generates a pulse train representing rotation of the shaft relative to the sleeve as a predetermined number of pulses per revolution; perhaps applicant intends to recite "a plurality of ferromagnetic segments in the sleeve" in the claim;

In claims 1,2,10-11, the phrase "the angle between the earth vector and a given position on the sleeve" is not clearly defined; it is unclear as to what is "position on the sleeve".

The claims not specifically addressed share the indefiniteness as they depend from rejected base claims.

3. Claims 1-11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
